

## Ammonia: Fact file

World production	140 million tonnes per year
UK production	1.3 million tonnes per year
Manufacture	Haber process
Raw material	Natural gas (methane), water, air

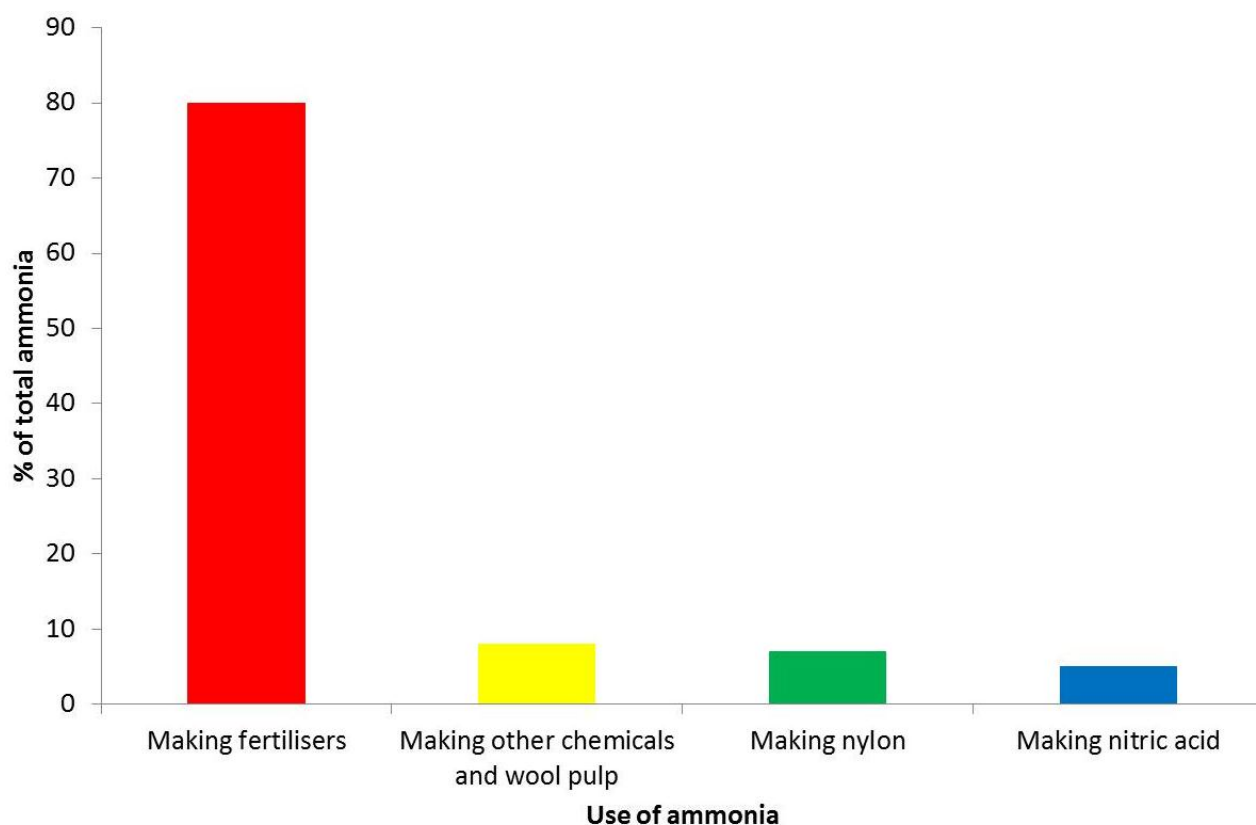

Figure: Chart to show the percentage amount of ammonia used for different processes.

Table: Table to show the percentage amount of ammonia used for different processes (as shown above).

Making fertilisers	80%
Making other chemicals and wool pulp	8%
Making nylon	7%
Making nitric acid	5%
