

Oil Refining: Fact file

World production	3,400 million tonnes per year
UK production	84 million tonnes per year
Manufacture	Fractional distillation and cracking
Raw material	Obtained from underground or undersea deposits in various parts of the world.

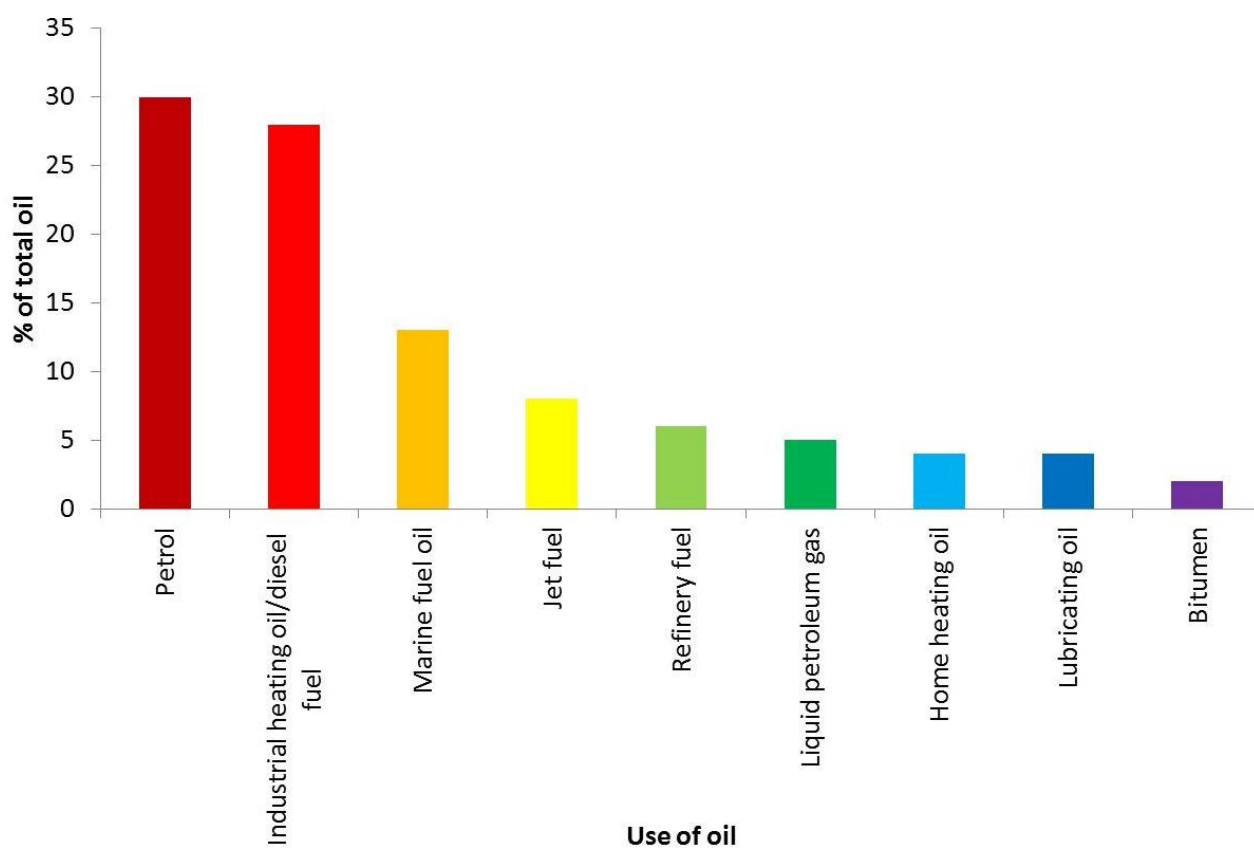

Figure: Chart to show the percentage amount of oil used for different sectors.

Table: Table to show the percentage amount of oil used for different sectors (as shown above).

	Petrol	30%
	Industrial heating oil / diesel fuel	28%
	Marine fuel oil	13%
	Jet fuel	8%
	Refinery fuel	6%
	Liquid petroleum gas	5%
	Home heating oil	4%
	Lubricating oil	4%
	Bitumen	2%
