

A Global Warning

Is the Earth getting warmer?

I have heard that scientists can't agree.

Global warming or cooling?

Yes, I think so but...

About what?

Don't be silly, they must. They all use the same data.

Then what's the problem?

I'm not sure... my Dad says the Times is a good paper... but when you look up global warming everything seems to be confused. Just look at some of the headlines.

Greenhouse Effect makes a come back

27/7/89

Ice age may be 50000 years late.

6/1/99

Met. Office says global warming is just a myth

11/9/94

A climate of confusion

Can we rely on the climate models. Its really hard to get good data to feed into the model.

27/9/95

Global Warming anomaly solved

Position of satellite probe

Oh, I see what you mean. We will just have to look at the real data and make up our own minds. But where should we start?
