

**COSHH: Control of
Substances Hazardous to Health**

Module 9

Health & Safety
Essentials

Registered charity number 207890

Final learning assessment

Are these statements true or false?		true	false
1.	The Health and Safety at Work Act prohibits dangerous activities.		
2.	HSE are the safety regulators.		
3.	All accidents must be recorded.		
4.	HSE can shut you down if you haven't done a risk assessment.		
5.	COSHH is about assessing the risk exclusively in relation to chemicals.		
6.	If someone else in the lab uses the same solvent mixtures as I do, then although my assay is a little different, I don't need to do risk assessments because she's already done them.		
7.	Mouldy mugs are health hazards.		
8.	Health surveillance means that I must have a yearly medical examination.		
9.	I have to accept that work is making me stressed, but that's just modern life.		
10.	I've finished with my aqueous/solvent mix, so I can tip it away down the sink followed by lots of water.		
11.	Security patrollers don't need to know what safety signs mean as long as they don't touch anything.		
12.	I must do an individual COSHH assessment for every single chemical I use.
