

Energy Card Sort Instructions: A number of card sorts based on the BBC4 programme Only Connect, all based around energy and the sun.

Energy Card Sort

- Cut out the 16 cards and lay them on the table.
- Sort them out into 4 groups by working out the connections. All the connections have something to do with Energy and the Sun.
- There will be exactly 4 cards in each group.

For example:

case, mark, shop, worm

- All can have the word **book** in front of them.

fountain, pig, marker, highlighter

- All types of **pens**.

Number 1 is the easiest, number 4 the hardest. Be careful though, there might be some red herrings!

If you get stuck, check out the 'cheat sheet' which will tell you what the connections are.
