Linking knowledge

Education in Chemistry
September 2019
rsc.li/2VCuGls

One way to encourage students to integrate new knowledge with what they already know is to ask them to fill out a revision map. They can connect the related terms, explain them, or add extra terms. Here are two examples.

Acids

						Pollution				
Acid indigesti	ion	Diges			<u> </u>			Rock		
		Stomac			Atmospheric acidity					
Acid so	oil						Met	tal		
				Acid						
		Acidity						M	letal oxide	
рН	lr	ndicators		Neutral					Metal carbo	onate
	<i>A</i>	Alkalinity		Alkali			Base			

Exothermic reaction
