

Kareena's Chemistry

Kareena Mistry is a 10 year old girl.

Her family speak **Gujarati** but mostly **English**.

She lives with her brother and parents.

Her mum is a **research chemist** who is always working on intriguing and insane projects like sticky tape that never gets fuzzy and **ice cream that never melts**.

Kareena loves boasting about her mum's latest **crazy research** and shares her mum's **love of chemistry**.

Her dad is an **amazing cook** and Kareena knows that chemistry and cooking have a lot in common. **Papa** doesn't like her **making a mess** in the kitchen though!

Kareena has a superhero alter ego - "K-Mistry", a chemistry whizz that transports her into a unreal wacky world where reality is suspended.

She uses the family kitchen **to undertake chemistry experiments** and **find out more** about the chemistry all around us.

She knows **how to be safe** because her mother and father **have rules** about what she can and can't do, and they're always "in the next room".

The concocting has to end when papa wants the kitchen back! – **It's nearly time for tea!**

Kareena - normal 10 year old girl and K-Mistry - chemical superhero
