

After meal puzzle

An ice cube floats on water in a glass tumbler or a cup. Apart from a piece of string the only items available are those that you would expect to find set out on a meal table.

- The puzzle is to remove the ice with the help of the string. Ingenuity is required; using cutlery or tying the string around the cube are forbidden.

Health & Safety

In planning this activity, you should consider health and safety. Check your plans with your teacher before implementing them.
