

Three isomeric alcohols

You are provided with three alcohols, labelled A, B and C, with isomeric structures that share the molecular formula $C_4H_{10}O$.

- Identify the three alcohols using standard laboratory tests.

Health & Safety

In planning this activity, you should consider health and safety. Treat all unknown chemicals as solutions as hazardous and check your plans with your teacher before implementing them.

Eye protection (Goggles to BS EN166 3) must be worn.

Keep away from sources of ignition.
