The new technologies helping to reduce food and packaging waste

Graphic organiser – instructions

In this activity you will use the information in the article. Packaging promise, to create a graphic organiser.

Read the article and as you are reading consider the following questions:

- Which packaging innovations are described? These will be the main headings in your graphic organiser
- How do the innovations work?
- What are the advantages of each innovation?
- What are the disadvantages of each innovation?

Now take a piece of plain A4 paper and a pencil and sketch out how you will organise the information. There are examples of layouts [here](#)

Once you are happy with your layout you can use coloured pens to finish your organiser and make the information clearer.
