

Business Skills for Chemists

Programme

Course Contact:

Designed for: Undergraduate Students of Chemical Science Degrees
(e.g. Chemistry, Chemical Engineering etc.)

Before the course: Please consider the following questions:

1. Do you already have any business skills that may be relevant to this course?
2. Which skills/areas of business would you like to gain a new/greater depth of knowledge of?
3. Do you have any ideas for a new chemistry related product or business that **you** could use as an example to work up within this course?
4. Think about how large scale (e.g. BP) and small scale (e.g. a drug research company) businesses operate and how they develop, manufacture, market and sell their products.
