# Titration method

In a titration you follow a sequence of steps to get a valid and accurate result. Follow these steps every time you do a titration.

Pipette filler

Volumetric pipette

Solution A

Conical flask

Dropping bottle & pipette (for indicator)

Clamp

Clamp stand

Solution B

Burette

White tile

Preparation

Add solution from the **burette** slowly and see the colour of the solution in the **conical flask** begin to change. The colour will fully change over the addition of a single drop.

Titration
