

Spot the bonding

The diagrams below show a few different chemical substances and a range of models. For each diagram either write:

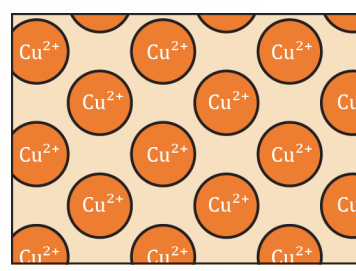

- the name(s) of the type(s) of bonding present
- 'none' (if there is no chemical bonding)
- 'don't know' (if you are unsure)

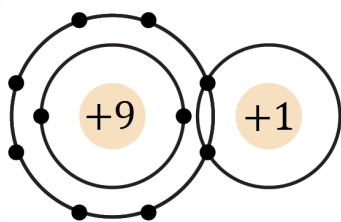

1. Sodium chloride lattice

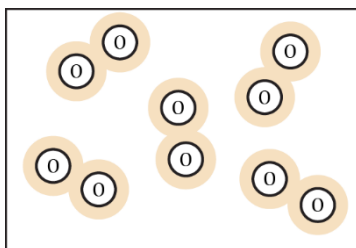

2. Diamond lattice

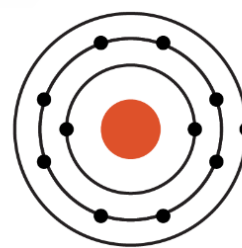

3. Copper metal lattice

4. Hydrogen fluoride molecule

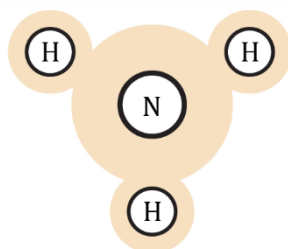

5. Oxygen gas

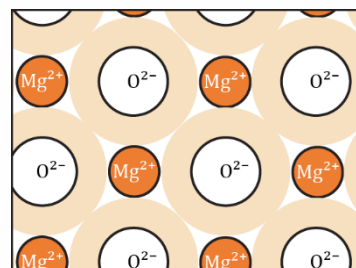

6. Sodium atom

7. Carbon dioxide molecule

8. Ammonia molecule

9. Magnesium oxide lattice
